

**DAMAST #doccetteria presents EDEN,  
the outdoor shower column that brings well-being back to its original  
place.**

With **EDEN**, Damast signs a new outdoor shower column proposal that stems from the essentiality of the gesture, in order to integrate discreetly into gardens, terraces, poolside areas, but also into spaces dedicated to relaxation not only outdoors. A reliable solution also for swimming pools, thermal environments and indoor wellness contexts, where functionality and durability must coexist with a refined aesthetic.

Not a simple product, but an essential solution for a setting designed to experience environments of balance and pleasure.

Characterised by an extremely slender and elegant line, **EDEN** appears as a light mark in space. The body has a diameter of just 45 mm and houses an on/off mixer inside, maintaining absolute formal cleanliness. The structure develops vertically for more than two metres (2290 mm), guiding the eye up to the shower head of the same section at the apex of the arch, perfectly integrated and capable of delivering a natural and enveloping rain spray thanks to a special aerator with anti-limescale function.

Made of brushed AISI 316L stainless steel, a material chosen by Damast #doccetteria for its high performance in extreme environments, **EDEN** guarantees corrosion resistance, long-lasting durability and reliability even in the presence of atmospheric agents. It is therefore ideal for environments exposed to salt spray, chlorine and high humidity, a choice that combines functionality, sustainability and attention to health.

**EDEN** becomes part of Damast's outdoor vision, joining other outdoor offerings in a journey that puts people, the environment, and the enjoyment of water at the center.

**Essential data**

**Description:** Freestanding outdoor shower column

**Material:** Brushed AISI 316L stainless steel

**Dimensions:** height 2290 mm; body diameter 45 mm; arch curvature up to the shower head 420 mm
